

Armstrong 4030 4x3x10

EQUIPMENT TYPE	Base-mounted end-suction centrifugal pump
SELECTED DUTY	420 gpm at 105 ft TDH
MOTOR	30 hp, 480 V, 3 phase, 60 Hz
CONFIGURATION	Back pull-out, mechanical seal, common base

Model-Specific Dimensional Schedule

Property	Published value	Coordination classification
Overall L x W x H	1780 x 760 x 980 mm	Installation critical
Base L x W	1840 x 780 mm	Installation critical
Suction connection	100 mm / 4 in horizontal flange	Installation critical
Discharge connection	80 mm / 3 in vertical flange, 25 mm offset	Installation critical
Motor-removal clearance	915 mm	Installation critical
Casing pressure	175 psig	Hard requirement
Duty-point efficiency	80 percent	Hard requirement

Coordination Note

The model satisfies the equipment envelope and service-clearance requirements. A 25 mm discharge spool adjustment is required.

Evidence Statement

This BuildCrew hackathon document is a model-specific demo extract prepared to exercise document provenance, BIM generation, placement, and coordination workflows. Values are fixed and traceable within the demo case.
