

KSB Etanorm 065-040-250

EQUIPMENT TYPE	Base-mounted end-suction centrifugal pump
SELECTED DUTY	420 gpm at 105 ft TDH
MOTOR	30 hp, 480 V, 3 phase, 60 Hz
CONFIGURATION	Back pull-out, mechanical seal, common base

Model-Specific Dimensional Schedule

Property	Published value	Coordination classification
Overall L x W x H	1740 x 780 x 1010 mm	Installation critical
Base L x W	1810 x 800 mm	Installation critical
Suction connection	DN100 / 4 in horizontal flange	Installation critical
Discharge connection	DN80 / 3 in vertical flange, 180 mm offset	Installation critical
Motor-removal clearance	860 mm	Installation critical
Casing pressure	175 psig	Hard requirement
Duty-point efficiency	80 percent	Hard requirement

Coordination Note

The published discharge centerline is 180 mm from the existing P-401 connection centerline and requires coordination before approval.

Evidence Statement

This BuildCrew hackathon document is a model-specific demo extract prepared to exercise document provenance, BIM generation, placement, and coordination workflows. Values are fixed and traceable within the demo case.
